### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: prior art of record does not describe or suggest applicants' invention set forth in claims 56-58, an electronic device that operates at or about room temperature on the Coulomb blockade effect comprising a first cluster comprising a metal cluster core having a radius of between 0.4 nm and about 1.8 nm and a second such cluster physically spaced apart from the first metal cluster at a distance of less than about 5 nm, where the physical separation between the first and second clusters is maintained by the clusters being coupled to a biomolecular scaffold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Cited Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wybourne et al. (J. Appl. Phys 1997 article) teaches the use of Coulomb-blockade transport in gold-cluster structures, including their operation at near room temperatures (abstract and title).
